

Button Lock Repair Kit MODEL: 549N

1. **Remove Rivet:** Drill out rivet of the broken button lock and remove pieces. Clean off nozzle.
2. **Position Nut:** Place #8-32 nut in well which contained rivet.
3. **Position Wand Adapter:** Position wand adapter on nozzle so that hole in wand adapter lines up with nut in the rivet well.
4. **Secure Wand Adapter:** Complete adapter connection by attaching with #8-32 screw included with kit.
