

Sensonic Speaker

4" Micro Speaker

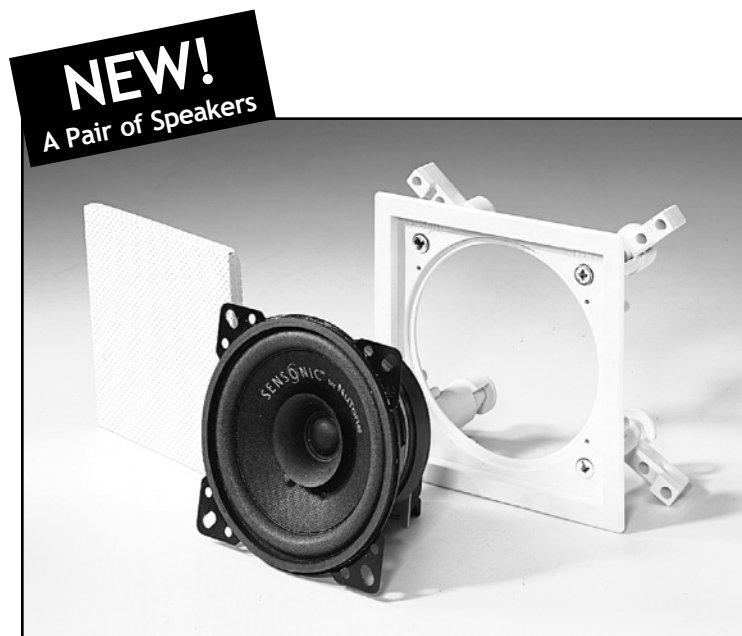

Model: MS8W4

INTRODUCTION

The Sensonic 4" micro speaker is designed to provide exceptional quality sound from a small package in Home Theater and back ground music applications. It is not only small enough to be completely unobtrusive, the grille and the frame are paintable. Therefore, when mounted, will completely merge with the room decor.

The speaker is a three-piece construction meaning the 4" speaker, the grille and the mounting frame are separate. The user has the option to mount the 4" speaker and the frame together at the same time. Or the frame can be mounted first and painted along with the grille. At a later date, the 4" speaker can be mounted on the frame. No rough-in frame is required in existing/retrofit construction application.

There are a pair of speakers in an individual carton.
